

## Parting Shots

Share your stories and photos with us! Send submissions to [partingshots@sbcmag.info](mailto:partingshots@sbcmag.info).

### Thank YOU for Another Great Show!

Each year after BCMC, staff enjoys receiving your comments and suggestions about the show—why you show up each year, what you especially liked about this year's show, how we might improve things for next year, etc. In the majority of cases these notes are gracious and full of thanks and fuel our enthusiasm as we come home to start planning next year's show. What you might not know is how much our staff enjoys and is thankful for all of you in this industry. YOU are the reason we look forward to this special week each year. We revel in the opportunity to get to meet so many of the individual component manufacturers and exhibitors that we serve throughout the year. Thank you for stopping by the BCMC booth to learn about all of the new educational, technical and marketing opportunities that are available from WTCA and other industry organizations. It was great to meet you and we look forward to seeing everyone again next year as we "Discover New Possibilities" in Columbus, OH!

THE  
**KOSKOVICH**  
COMPANY  
Automation that works.™

# ALLinearSaw

**High-Speed. Heavy-Duty.  
The best just got better!**  
NOW with the Automated In-Feed and Out-Feed Queue System!

**Add automated in-feed and out-feed queue to your ALS. It will pay for itself in less than a year!**  
**Cut your labor cost in half!** Turn a two-man job into a one-person operation!

Safer, faster, more reliable and efficient, the heavy-duty servo motors of the Alpine Linear Saw (ALS) are designed and manufactured to provide consistent, accurate cuts with a single blade. Setups take just a fraction of a second, and all standard truss parts can be cut from any lumber width from 2x3 to 2x14: single-cut webs, double-cut webs, bevel cuts, step-cut webs, off-centerline parts, regular bottom chords, scissor bottom chords — whatever the job requires! And new automated in-feed and out-feed queue capabilities mean increased safety and lower labor costs.

**Call us or log-on for a free DVD that shows the ALS in action.**
