Snow Removal

This winter has dumped record-breaking amounts of snow in some parts of the U.S., with loads threatening the structural integrity of some buildings. Clearing the snow off the roof is a necessary measure to ensure the structure doesn't become damaged under the enormous snow load. WTCA member Jason Groft of R&R Components in York, PA snapped this shot of a seemingly brave man precariously clearing the snow from a roof at a jobsite. We think the cold might have gotten to his head!

Saw Blade Storage

Another member, Bill Arnott of McGinnis Saw Service in Dewey, AZ, went to a customer's component shop to pick up these saw blades to be serviced. It appears that someone tossed the blades onto a pallet and then lumber was piled on top (to keep the blades well protected of course!). McGinnis said, "This is not how you store your spare blades for a change over." **SBC**

KOSKOVICH
COMPANY
Automation that works.™

Great companies focus on growth. They see possibilities. They create success.

Great companies find business partners that understand their needs. Intelligent Building Systems offers structural framing software and equipment that intuitively produce wall panels.

You can depend on IBS to increase your profitability by offering options that complement your existing product line.

Call for your free copy of the Wall Panel Equipment Guide, including details on our new Single Tool Nailing Bridge.
