

STRUCTURAL BUILDING COMPONENTS MAGAZINE (FORMERLY WOODWORDS)

June/July 1999

"SETMA 2000: Family Fun" by Doug LaChapelle, 2000 SETMA Chairman

Plans are already under way for next year's seminar to be held in Orlando, Florida. We would like to encourage everyone to make plans now to attend. It will be held April 19-21, the Wednesday, Thursday, and Friday before Easter. This will allow those folks that would like to make it a family affair to attend the seminar as well as enjoy the fun of Disney World with the family while the kids are on Easter break.

While we had a good turn out this past year, we know there are more manufacturers out there that haven't been attending, and we would like to encourage as many as possible to come and join in on both the fun and the educational benefits that the seminar has to offer. Remember, this is your Association. For those that are not aware of it, the Southeast Truss Manufacturers Association is made up of all of the local Associations in the Southeast, all of which are WTCA Chapters. Over the past several years we have become more involved with WTCA and feel that this has been a positive step in strengthening and uniting our industry.

Each Association is encouraged to have two representatives on SETMA's Board, and to participate in planning and running of the Association. We are also interested in knowing what direction you would like to see the Association take. The Southeast Seminar offers component manufacturers in the Southeast an opportunity to meet with other manufacturers in their area, and discuss local issues and solve local problems together, while seeing what's new that suppliers to our industry have to offer.

Again, I invite and encourage you to join us in Orlando next year.

The mission of Structural Building Components Magazine (SBC) is to increase the knowledge of and to promote the common interests of those engaged in manufacturing and distributing of structural building components to ensure growth and continuity, and to be the information conduit by staying abreast of leading-edge issues. SBC will take a leadership role on behalf of the component industry in disseminating technical and marketplace information, and will maintain advisory committees consisting of the most knowledgeable professionals in the industry. The opinions expressed in SBC are those of the authors and those quoted solely, and are not necessarily the opinions of any of the affiliated associations (SBCC, WTCA, SCDA & STCA).
