

### **Autozen Automation Expands into Canada with LimTek Solutions Inc.**

PALM BAY, Florida (October 3, 2014) - After successfully establishing a much needed service option through expert support and a cost effective parts solution for US based automated machinery owners, Autozen Automation announces a business alliance with LimTek Solutions Inc. to service and support Canadian based automated machinery owners.

"Over the past year business has been excellent and US truss plants are so appreciative that we can keep their automated machines running smoothly by providing telephone support, service and parts.", says Lance Yeager, Owner of Autozen Automation.

"I've covered a lot of territory the past year and almost every truss plant in Canada has at least one piece of automated machinery. As requested, I now have a solution for Canadian truss plants through Autozen Automation.", says Edmond Lim, P.Eng. owner of LimTek Solutions Inc.

"I look forward to working with Ed to provide much needed service, telephone support and parts to Canada. People will be glad to learn that I have some cost effective parts solutions that will be a big relief knowing that a replacement part is on the way and additional savings can be had if you send me your defective part for credit if applicable.", adds Lance Yeager.

Autozen Automation, specializes in providing service and parts for Alpine equipment including all series of automated saws and roller gantry tables including all series of AutoSet air wrench and automated AutoSet C and AutoSet C4 tables.
